10 Reasons to use an Alkota Parts Washer

- **SAFETY**
Hot water and biodegradable detergents are safe to work with.
- **COMPACT DESIGN**
Our fully self contained washers are about the same size as a solvent tank.
- **FULLY AUTOMATIC**
Times cycle allows the user to perform other tasks while parts are washed.
- **CLEANER PARTS**
Dirt, oil and grease naturally separate from water. The wash solution remains cleaner and does not redeposit on the parts enhancing quality.
- **OIL SKIMMER**
The oil skimmer removes floating petroleum products.
- **TURNTABLE ROTATION**
The turntable turns the parts to ensure complete exposure to wash solution resulting in cleaner parts.
- **HAND BRUSH**
An optional pump fed hand brush is available for larger parts and special detailing.
- **NATIONWIDE SERVICE**
With Alkota you have the support of a large service network.
- **ENVIRONMENT**
No dangerous and damaging solvents. Just hot water and biodegradable detergents.
- **BOTTOM LINE**
Parts washers take the manual labor out of parts cleaning improving your bottom line!
